DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- 1- Triol (I) R or S
- 2- Triol (II) R or S
- 3- Tetraol (III) R or S
- 4- X of NbX₅ alkoxide
- 5- X of NbX₅ halogen
- 6- reaction substrate R⁵R⁶ C=N-Z
- 7- reaction substrate Formula IV
- 8- reaction substrate Formula V
- 9- reaction substrate Formula VI
- 10- reaction substrate epoxide
- 11- additive imidazole
- 12- additive zeolite

And the substituents R⁵, R⁶, R¹, R², R³, R⁴, R⁷, R⁸, R⁹, R¹⁰, R¹¹, R¹², R¹³, R¹⁴, Y, Z

Applicant is required, in reply to this action, to elect a **single disclosed species** to which the claims shall be restricted if no generic claim is finally held to be allowable. *For example, if*

Applicants elect a triol, then Applicants must also elect a single disclosed method in which this triol is used, electing therein a single disclosed substrate, additive and naming the substituent(s) to the extent, possible.. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the substrates are of different structures and the binaphthol structures and niobium compound of the catalysts are structurally disparate, where art found anticipating one may not necessarily render the other obvious.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1621

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
